INTERNATIONAL JOURNAL OF PRODUCTION RESEARCH

CONTENTS

Volume 33, 1995

International Journal of Production Research

Editor in Chief
Professor Roy J. Sury, PhD, CEng
Department of Manufacturing Engineering, Loughborough University of Technology
Leicestershire LE11 3TU, UK

Editor
John E. Middle, MSc, CEng

Reviews Editor
Geoffrey F. Modlen, PhD, CEng

Editorial Board

Australia:	Dr G. M. Buxey, Deakin University
Belgium:	Professor L. F. Gelders, Centre for Industrial Management, Leuven
Canada:	Professor A. K. S. Jardine, University of Toronto
France:	Professor J. E. Erschler, INSA-LAAS-CNRS, Toulouse
Germany:	Professor Dr-Ing H. Bullinger, Fraunhofer-IAO, Stuttgart
	Professor Dr-Ing H. J. Warnecke, Fraunhofer-IPA, Stuttgart
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven, Eindhoven
Hong Kong:	Professor W. S. Lau, Hong Kong Polytechnic
Italy:	Professor U. Bertele, Politecnico di Milano, Milano
India:	Professor N. K. Tewari, Indian Institute of Technology, New Delhi
Israel:	Professor E. Dar-El, Technion-Israel Institute of Technology, Haifa
	Professor D. Sipper, Tel Aviv University
Japan:	Professor K. Hitomi, PE, PEcon, Ryukoku University, Kyoto
	Professor M. Yamamoto, Hosei University, Tokyo
New Zealand:	Professor L. Foulds, Department of Management Systems, University of Waikato
PR China:	Professor S. C. Wang, Beijing University of Aeronautics and Astronautics, Beijing
Poland:	Professor Dr Z. Wilimowska, Technical University of Wroclaw, Wroclaw
Singapore:	Professor L. Lim, Nanyang Technological University
South Africa:	Professor R. Reinecke, University of Stellenbosch
South Korea:	Dr H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor S. Axsäter, Lund University
Switzerland:	Professor Dr F. Rehsteiner, Zürich
United Kingdom:	Professor C. Andrew, University of Cambridge
	Professor C. B. Besant, Imperial College of Science and Technology, London
	Professor A. S. Carrie, University of Strathclyde
	Professor J. Parnaby, Lucas Industries, Solihull
USA:	Professor J. F. Bard, The University of Texas at Austin, Texas
	Professor G. Boothroyd, University of Rhode Island, Kingston, RI
	Dr S. B. Gershwin, Massachusetts Institute of Technology, Cambridge, MA
	Professor J. N. D. Gupta, Ball State University, IN
	Professor K. Knott, Pennsylvania State University, PA
	Professor A. Kusiak, University of Iowa, IA
	Professor W. L. Maxwell, Cornell University, NY
	Professor C. Moodie, Purdue University, West Lafayette, IN
	Professor N. Singh, Wayne State University, Detroit, MN
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

Subscription information

International Journal of Production Research (ISSN 0020–7543) is published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK. Tel: +44 (0)171 405 2237; Fax: +44 (0)171 831 2035.

Annual subscription 1996 £770, US $1270. Personal subscription 1996 to members of the Manufacturing Division of the Institution of Electrical Engineers: £110, US $219. Personal subscriptions are available to home addresses only and must be paid by personal cheque or credit card.

Second class postage paid at Jamaica, NY 11431, USA. US Postmasters: send address changes to *International Journal of Production Research*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003, USA. Air freight and mailing in the USA by Publications Expediting Inc.

Printed by Burgess Science Press, Rankine Road, Basingstoke RG24 8PR, UK. The paper used in this publication is 'acid free' and conforms to the American National Standards Institute requirements in this respect.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan and Australasia. Subscriptions are entered on an annual basis, i.e. January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributors: **India:** Universal Subscription Agency Pvt. Ltd, 101–102 Community Centre, Malviya Nagar Extn, Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Co. Ltd, Journal Department, PO Box 55, Chitose, Tokyo 156. **USA, Canada and Mexico:** Taylor & Francis Inc., 1900 Frost Road, Suite 101, Bristol, PA 19007, USA. **UK and all other territories:** Taylor & Francis Ltd, Rankine Road, Basingstoke RG24 8PR, UK.

International Journal of Production Research

Volume 33, 1995—CONTENTS

No. 1 January 1995

A mathematical programming approach to joint cell formation and operation allocation in cellular manufacturing. A. ATMANI, R. S. LASHKARI and R. J. CARON 1

Feature-based operation sequence generation in CAPP. S. A. IRANI, H.-Y. KOO and S. RAMAN 17

Lot size dependent lead times in a Q,R inventory system. J. S. KIM and W. C. BENTON 41

An experimental investigation of scheduling non-identical, parallel processors with sequence-dependent set-up times and due dates. S. U. RANDHAWA and T. A. SMITH 59

Machining economics with machine interference considerations. C. KOULAMAS and E. IAKOVOU 71

Period batch control in group technology. B. K. KAKU and L. J. KRAJEWSKI 79

Vision-based shape recognition and analysis of machined parts. J.-M. CHEN and J. A. VENTURA 101

Production loss functions and subjective assessments of forecast errors: untapped sources for effective master production scheduling R. J. EBERT and T. S. LEE 137

A hierarchical bicriterion approach to integrated process plan selection and job shop scheduling. P. BRANDIMARTE and M. CALDERINI 161

Facilities layout design optimization with single loop material flow path configuration. P. BANERJEE and Y. ZHOU 183

MRP systems under supply and process uncertainty in an integrated shop floor control environment. S. M. GUPTA and L. BRENNAN 205

An empirical study of division and plant performance measurement systems in selected world class manufacturing firms: linkages for competitive advantage. A. LOCKAMY III and J. F. COX III 221

Modelling an automated storage and retrieval system using Petri nets. S.-C. LIN and H.-P. B. WANG 237

Optimal investment and lot-sizing policies for improved productivity and quality. A. GUNASEKARAN, A. R. KORUKONDA, I. VIRTANEN and P. YLI-OLLI 261

A simulation analyses of factors influencing loading practices in cellular manufacturing. S. M. SHAFER and J. M. CHARNES 279

Errata 291

Announcements 292

No. 2. February 1995

A neural network-based cell formation algorithm in cellular manufacturing. S.-J. CHEN and C.-S. CHENG 293

Downtime analysis for automatic moulding plants. H. LUCZAK and J. SALLMANN 319

Balancing flexible lines for car components assembly. A. AGNETIS, A. CIANCIMINO, M. LUCERTINI and M. PIZZICHELLA 333

Algorithm for tool placement in an automatic tool change magazine. G. LEVITIN and J. RUBINOVITZ 351

Configuring cellular manufacturing systems: a quadratic integer programming formulation and a simple interchange heuristic. S. VISWANATHAN ... 361

Prioritization of kanbans in the case of a single station serving multiple downstream stations. X. CHAO, S. K. DAS and P. NAGENDRA 377

A cutting damping index for real-time monitoring of tool wear in turning. D. Y. JANG and Y. G. CHOI 391

Intelligent design retrieval and packaging system: application of neural networks in design and manufacturing. A. BAHRAMI, M. LYNCH and C. H. DAGLI 405

New inspection planning strategy for sculptured surfaces using coordinate measuring machine. M. W. CHO and K. KIM 427

Machine performance monitoring and fault classification using an exponentially weighted moving average scheme. J. SPOERRE and H.-P. BEN WANG ... 445

Optimization of cube-per-order index warehouse layouts with zoning constraints. C. J. MALMBORG 465

Uncertainty-dampening methods for reducing MRP system nervousness. C.-J. HO, W.-K. LAW and R. RAMPAL 483

Distinguishing between mean, variance and autocorrelation changes in statistical quality control. Y. GUO and K. J. DOOLEY... 497

Antecedents of leadtime competitiveness in make-to-order manufacturing firms. R. B. HANDFIELD and R. T. PANNESI 511

A simulation analysis of robot service movements in FMC. Y. B. PARK 539

Feature modification framework for feature based design systems. R.-K. LI, C.-Y. LIN and H.-H. WU 549

Effect of maintenance policies on the just-in-time production system. G. ABDULNOUR, R. A. DUDEK and M. L. SMITH 565

Announcement 585

No. 3. March 1995

A concurrent engineering methodology using analogies to Just-In-Time concepts. T. ADACHI, T. ENKAWA and L. C. SHIH 587

Sensitivity analysis of a manufacturing workstation using perturbation analysis techniques. B. HEIDERGOTT... 611

Dealing with a shelf life constraint in cyclic scheduling by adjusting both cycle time and production rate. E. A. SILVER 623

The impact of learning rate and constraints on production line performance. B. J. FINCH and R. LUEBBE 631

Simulation of tool and part flows in FMSs. A. GRIECO, Q. SEMERARO, T. TOLIO and S. TOMA 643

Verification of NC tool path and manual and automatic editing of NC code. C. B. KIM, S. PARK and M. Y. YANG 659

Manufacturing cell formation in the presence of lot splitting and multiple units of the same machine. R. LOGENDRAN and P. RAMAKRISHNA 675

Throughput equivalencies in fork/join queueing networks with finite buffers and general service times. C.-H. PAIK and D.-W. TCHA 695

Applications of neural networks in manufacturing: a state-of-the-art survey. H.-C. ZHANG and S. H. HUANG 705

Unfolding sheet metal parts: a graph-based approach. S. YEH, M. KAMRAM and B. O. NNAJI 729

Quantifying the advantages of production quota flexibility in the automotive industry. R. R. INMAN 741

Design and scheduling of flexible assembly lines for printed circuit boards. M. M. DESSOUKY, S. ADIGA and K. PARK 757

Multivariate analysis of the effect of learning and forgetting on product quality. A. B. BADIRU 777

A vector analytic (VECAN) method for solving the machine-part grouping problem in GT. S. K. MUKHOPADHYAY and A. GOPALAKRISHNAN 795

Expert CAPP system for single spindle automats. S. S. PANDE and V. S. DESAI 819

Geometrics in computer-aided tolerance charting. B. K. A. NGOI and C. K. TAN 835

A note on improving the performance of the enhanced dynamic cycle lengths heuristic for the multi-item, single machine scheduling problem. A. GASCON, R. C. LEACHMAN and P. LEFRANÇOIS 869

Announcement 875

No. 4. April 1995

Evaluating the effect of tool management on flexible manufacturing system performance. U. A. W. TETZLAFF 877

Machine-part family formation with the adaptive resonance theory paradigm. C. DAGLI and R. HUGGAHALLI 893

A contingency perspective of just-in-time purchasing: globalization, implementation, and performance. S. E. FAWCETT and J. SCULLY 915

Japanese manufacturing performance criteria. T. D. FRY 933

Object-oriented systems analysis and definition of manufacturing operations. B. WU 955

A stochastic approach to assembly line balancing. M. M. NKASU and K. H. LEUNG 975

Computerised blank shape prediction for sheet metal components having doubly-curved surfaces. G. N. BLOUNT and B. V. FISCHER 993

An improved algorithm for solving the economic lot size problem (ELSP). S. G. DAVIS 1007

A kanban-based simulation study of a mixed model just-in-time manufacturing line. I. H. YAVUZ and A. ŞATIR 1027

A multi-constraint neural network for the pragmatic design of cellular manufacturing systems. H. A. RAO and P. GU 1049

Determination of turret configuration and hit sequence for optimization of NC turret punch press operation. S. KUMAR and D. VEERAMANI 1071

Moments-based clustering techniques for manufacturing cell formation. S. K. MUKHOPADHYAY, A. GOPALAKRISHNAN and M. K. KRIPALANI 1091

Computer-aided tolerance charting—a 'black box' approach. B. K. A. NGOI and C. K. TAN 1117

Flexible guidepath design for automated guided vehicle systems. Y. SEO and P. J. EGBELU 1135

Modelling the performance of a kanban assembly shop. W. PRICE, M. GRAVEL, A. L. NSAKANDA and F. CANTIN 1169

Book reviews 1177

Announcement 1183

Erratum 1185

No. 5. May 1995

Crane scheduling with time windows in circuit board production lines. Y. GE and Y. YIH 1187

SYSMIQ: a knowledge-based system for assisting quality control. V. DESLANDRES and H. PIERREVAL 1201

Motion economy analysis for robotic kitting tasks. Y. EDAN and S. Y. NOF 1213

Neuro-fuzzy GMDH and its application to modelling grinding characteristics. K. NAGASAKA, H. ICHIHASHI and R. LEONARD 1229

An order release mechanism for a flexible flow system. S. LINGAYAT, J. MITTENTHAL and R. M. O'KEEFE 1241

A hierarchical approach for metal parts fabrication. E. IAKOVOU, K. MALIK and J. A. MUCKSTADT 1257

An analysis of the product–process matrix and repetitive manufacturing. M. S. SPENCER and J. F. COX 1275

A dynamic forecasting model for job shop flowtime prediction and tardiness control. S. T. ENNS 1295

A comparison of multivariate moving average control charts for the process mean. T. M. MARGAVIO and M. D. CONERLY 1313

Fractional cell formation in group technology. CH. V. R. MURTHY and G. SRINIVASAN 1323

An approach to find the minimum wall thickness of a part from its B-Rep model. C. OU-YANG and Y. C. YUAN 1339

Scheduling flexible flow lines with no in-process buffers. T. J. SAWIK ... 1357

A spreadsheet model approach for integrating static capacity planning and stochastic queueing models. P.-H. KOO, C. L. MOODIE and J. J. TALAVAGE 1369

Optimal numbers of two kinds of kanbans in a JIT production system. K. OHNO, K. NAKASHIMA and M. KOJIMA 1387

Information technology in operations management: a theory-of-constraints approach. A. COMAN and B. RONEN 1403

A rule-based, object-oriented framework for operating flexible manufacturing systems. C. BASNET and J. H. MIZE 1417

Flexible inspection system based on a vision guided coordinate measuring machine. M. W. CHO, M. K. KIM and K. KIM 1433

A knowledgeable simulated annealing scheme for the early/tardy flow shop scheduling problem. S. H. ZEGORDI, K. ITOH and T. ENKAWA 1449

A generalized multi-pass machining model for machining parameter selection in turning. F. P. TAN and R. C. CREESE 1467

Book reviews 1489

Announcement 1491

No. 6. June 1995

Optimum production technology (OPT) and the theory of constraints (TOC): analysis and genealogy. M. S. SPENCER and J. F. COX 1495

A sliding algorithm for optimal nesting of arbitrarily shaped sheet metal blanks. Y. K. D. V. PRASAD, S. SOMASUNDARAM and K. P. RAO 1505

Assessing the impact of reducing demand variance through improved planning on the performance of a dual resource constrained job shop. L. D. FREDENDALL and S. A. MELNYK 1521

A new stochastic neural network model and its application to grouping parts and tools in flexible manufacturing systems. I. ARIZONO, M. KATO, A. YAMAMOTO and H. OHTA 1535

Load smoothing with feedback in a bottleneck job shop. P. S. PARK and G. J. SALEGNA 1549

A system for automatic extraction of 3D part features using syntactic pattern recognition techniques. V. S. KULKARNI and S. S. PANDE 1569

'Common sense' realities of planning and scheduling in printed circuit board production. K. N. MCKAY, F. R. SAFAYENI and J. A. BUZACOTT 1587

An adaptive sample size CUSUM control chart. H. P. ANNADI, J. B. KEATS, G. C. RUNGER and D. C. MONTGOMERY 1605

An investigation of the static stability in self-piloting drilling. V. P. ASTAKHOV, V. V. GALITSKY and M. O. M. OSMAN 1617
Continuous flow models for batch manufacturing: a basis for a hierarchical approach. P. BRANDIMARTE, W. UKOVICH and A. VILLA 1635
Shuffling heuristics for the storage location assignment in an AS/RS. B. MURALIDHARAN, R. J. LINN and R. PANDIT 1661
A note on the problem of scheduling a flexible manufacturing system for Just-in-time customers. H. C. CO and J. ZHU 1673
A new machine strategy for sculptured surfaces using offset surface. K. I. KIM and K. KIM 1683
Cycle counting in a JIT environment using V-A-T focusing. M. S. SPENCER 1699
The Perrego algorithm: a flexible machine–component grouping algorithm based on group technology techniques. T. A. PERREGO, H. C. PETERSEN and W. F. HAHN 1709
A new cutter path construction technique for milling machines. S. MARSHALL and J. G. GRIFFITHS 1723
Using the theory of constraints to guide the implementation of quality improvement projects in manufacturing operations. J. B. ATWATER and S. S. CHAKRAVORTY 1737
The capacitated cell formation problem: a new hierarchical methodology. N. C. SURESH, J. SLOMP and S. KAPARTHI 1761
Book reviews 1785
Announcement 1789

No. 7. July 1995

Models and solution approaches for part movement minimization and load balancing in FMS with machine, tool and process plan flexibilities. B. K. MODI and K. SHANKER 1791
Detecting process non-randomness through a fast and cumulative learning ART-based pattern recognizer. H. B. HWARNG and C. W. CHONG 1817
An analysis of multi-level lot-sizing problems with a bottleneck under a rolling schedule environment. B. TOKLU and J. M. WILSON 1835
The use of upstream and downstream information in scheduling semi-conductor batch operations. J. K. ROBINSON, J. W. FOWLER and J. F. BARD 1849
A simulation approach for the analysis of the effect of randomness in cutting surface constraints in the machining economics problem. H. SARPER ... 1871
The role of MRP in repetitive manufacturing. M. S. SPENCER and J. F. COX 1881
Counterpropagation neural network for modelling a continuous correlated process. A. D. WHITTAKER and D. F. COOK 1901
A genetic algorithm approach to curve fitting. M. GULSEN, A. E. SMITH and D. M. TATE 1911

Terminal location and guide path design in terminal based AGV systems. S. V. MAJETY and M. H. WANG 1925
Neural-network based fault diagnosis of hydraulic forging presses in China. H. LIN, Y. YIH and G. SALVENDY 1939
The design of a line control system for the modular furniture industry. F. ROMERO-SUBIRÓN and P. ROSADO 1953
A framework for modelling setup carryover in the capacitated lot sizing problem. M. GOPALAKRISHNAN, D. M. MILLER and C. P. SCHMIDT 1973
Heuristic algorithms for buffer allocation in a production line with unreliable machines. D. SEONG, S. Y. CHANG and Y. HONG 1989
Integrative versus separate cycle scheduling heuristics for capacitated discrete lot sizing and sequencing problems. D. KIM and V. A. MABERT 2007
A prototype fuzzy resistance spot welding system. L. P. KHOO and H. Y. YOUNG 2023
A performance measuring matrix for capturing the impact of AMT. H. NOORI and D. GILLEN 2037
Discussion. Revisiting the mixed-model multi-level just-in-time scheduling problem. J. MILTENBURG and G. SINNAMON 2049
Which is better, off-line or real-time scheduling? Y.-W. WAN 2053
Discussion. A note on 'scheduling mixed-model multi-level just-in-time production systems' 2061
Book reviews 2065
Announcement 2067

No. 8 August 1995

Optimization analysis for recycle-oriented manufacturing systems. T. HOSHINO, K. YURA and K. HITOMI 2069
Design of cellular manufacturing systems in tandem configuration. N.-E. DAHEL 2079
A new rescheduling method for computer based scheduling systems. H.-H. WU and R.-K. LI 2097
An age-based replacement policy with non-zero repair times for a continuous production process. L. M. A. PINTELON, F. L. B. VAN PUYVELDE and L. F. GELDERS 2111
Estimation of optimal profit for a production process with unknown variance. D. P. MIHALKO and D. Y. GOLHAR 2125
A low-cost vision system combining conventional and artificial intelligence techniques for complex image inspection and verification. B. J. GRIFFITHS and B. WILKIE 2133
Converting functional manufacturing systems into focused machine cells—a bicriterion approach. M. LIANG and S. M. TABOUN 2147
Managing worker flexibility and attrition in dual resource constrained job shops. T. D. FRY, H. V. KHER and M. K. MALHOTRA 2163

Launching and dispatching strategies for multi-criteria control of closed manufacturing systems with flexible routeing capability. R. PIPLANI and J. TALAVAGE 2181

The relationship between part type demand and FMS loading policies. Z. M. MOHAMED and J. J. BERNADO 2197

Improving palletisation efficiency—the theoretical basis and practical application. W. B. DOWSLAND 2213

Analysis of operating policies for manufacturing cells. J.-F. KAO and J. L. SANDERS 2223

Lot-sizing rules and freezing the master production schedule in material requirements planning systems under demand uncertainty. X. ZHAO, J. C. GOODALE and T. S. LEE 2241

Joint decision making for production and marketing. G. ULUSOY and T. YAZGAÇ 2277

A heuristic for setting up a flexible assembly system. M.-W. PARK and Y.-D. KIM 2295

A strong cutting plane algorithm for the robotic assembly line balancing problem. H. KIM and S. PARK 2311

Cell control research—current status and development trends. D. XIANG and C. O'BRIEN 2352

Book reviews 2353

No. 9. September 1995

The formation of subfamilies for machine loading of flow-line cells. M. M. SOLOMON, R. A. MILLEN and P. AFENTAKIS 2357

Regression-based due date assignment rules for improved assembly shop performance. C. H. SMITH, E. D. MINOR and H. J. WEN 2375

Analysing the probabilities of the natural resting aspects of a component with a displaced centre of gravity. B. K. A. NGOI, S. S. G. LEE and L. E. N. LIM 2387

A variable-parameter unsupervised learning clustering neural network approach with application to machine-part group formation. B. MALAKOOTI and Z. YANG 2395

Process planning interface for a shop floor control architecture for computer-integrated manufacturing. S. LEE, R. A. WYSK and J. S. SMITH 2415

Robust design and optimization of material handling in an FMS. J. S. SHANG 2437

Tool condition monitoring by acoustic analysis through a solid path. H. PAN, Y. CHEN, E. ORADY and F. YAN 2455

An object-oriented simulation architecture with real-time capabilities. Y. DESSOUKY, C. ROBERTS and T. BEAUMARIAGE 2471

Component grouping for GT applications—a fuzzy clustering approach with validity measure. N. N. Z. GINDY, T. M. RATCHEV and K. CASE 2493

Performance analysis of flexible workcentres using multiqueue models. R. RAM and N. VISWANADHAM 2511

Due-date setting methodologies based on simulated annealing—an experimental study in a real-life job shop. T. S. RAGHU and C. RAJENDRAN 2535

Determination of optimal subdivision of depth of cut in multipass turning with constraints. R. GUPTA, J. L. BATRA and G. K. LAL 2555

An improved version of the production switching heuristic for the aggregate production planning problem. H. HWANG and C. N. CHA 2567

Examining the impact of demand lumpiness on the lot-sizing performance in MRP systems. C.-J. HO 2579

A simulated annealing solution to the cell formation problem. C.-L. CHEN, N. A. COTRUVO and W. BAEK 2601

A simulation generator for dual-card kanban-controlled flow shops. K. R. CHRISTENSON and C. A. DOGAN 2615

An AI vision system for the inspection of complex coloured objects. B. A. WILKIE, B. J. GRIFFITHS, Y. S. WANG, P. NORGATE and P. A. SILVERWOOD 2633

Book reviews 2649

No. 10. October 1995

Comparison of dynamic routeing techniques for automated guided vehicle system. F. TAGHABONI-DUTTA and J. M. A. TANCHOCO 2653

An effective part-selection model for production planning of flexible manufacturing systems. F. F. CHEN, J.-I. KER and K. KLEAWPATINON 2671

Scheduling batch processing machines with incompatible job families. R. UZSOY 2685

Relations between $\bar{X}$ control chart design variables and production control. E. DEL CASTILLO 2709

Process planning for multi-axis NC machining of free surfaces. S.-H. SUH and J.-K. KANG 2723

An expert system based approach to manufacturing cell design. A. BASU, N. HYER and A. SHTUB 2739

A critical evaluation of four manufacturing simulators. V. HLUPIC and R. J. PAUL 2757

Defective units in a continuous review (s, Q) system. M. J. PAKNEJAD, F. NASRI and J. F. AFFISCO 2767

On the performance of hybrid multi-cell flexible manufacturing systems. C. L. ANG 2779

An integrated system for controlling shop loading and work flow. S. T. ENNS 2801

An adaptation of the EWMA chart for short run SPC. G. S. WASSERMAN 2821

A neural network model for on-line control of flexible manufacturing systems. G. HAO, J. S. SHANG and L. G. VARGAS 2835

Continuous review (*s*, *S*) policies for inventory systems incorporating a cutoff transaction size. R. H. HOLLIER, K. L. MAK and C. L. LAM ... 2855

Order-release planning using variable lead times based on a backward simulation model. E. F. WATSON, D. J. MEDEIROS and R. P. SADOWSKI ... 2867

Expected travel time and optimal boundary formulas for a two-class-based automated storage/retrieval system. P. KOUVELIS and V. PAPANICOLAOU 2889

Commissioning of a servo-pneumatic system for timing and profile control in a high speed food packaging application. J. PU, P. R. MOORE and C. B. WONG 2907

Automated process control and quality engineering for processes with damped controllers. E. A. ELSAYED, J. L. RIBEIRO and M.-K. LEE... 2923

Application of ELSP solution techniques to the deterministic robotic scheduling problem. C. KOULAMAS 2933

No. 11 November 1995

The impact of institutional factors on forecast accuracy: manufacturing executives perspective. J. G. WACKER and L. G. SPRAGUE 2945

An economic approach towards using individual measurements to control the mean of continuously monitored processes. J. SHEIL... 2959

Allocation of tasks to stations in small-batch assembly with learning: basic concepts. R. KARNI and Y. T. HERER 2973

Simulation, animation, and analysis of design disassembly for maintainability analysis. R. VUJOSEVIC, R. RASKAR, N. V. YETUKURI, M. C. JOTHISHANKAR and S.-H. JUANG 2999

Modelling battery constraints in discrete event automated guided vehicle simulations. R. MCHANEY 3023

An empirical investigation of critical TQM factors using exploratory factor analysis. N. TAMIMI 3041

Impact of JIT on organizational performance of U.S. firms. D. CHANG and S. M. LEE 3053

CAD-directed automatic assembly sequence planning. P. GU and X. YAN 3069

Multilayer perceptrons for detecting cyclic data on control charts. H. B. HWARNG 3101

Planning product disassembly for material recovery opportunities. M. R. JOHNSON and M. H. WANG 3119

A simple lot-scheduling model for just-in-time manufacturing. I. AL-ASSERI and M. HARIGA 3143

Analysing the natural resting aspects of a complex part. B. K. A. Ngoi, L. E. N. Lim and S. S. G. Lee 3163

Rolling horizon procedures for dynamic parallel machine scheduling with sequence-dependent setup times. I. M. Ovacik and R. Uzsoy 3173

Integration of simulation and emulation with graphical design for the development of cell control programs. J. P. Witzerman and S. Y. Nof 3193

Production pattern of machinery firms: viewpoints of technology and management. C. Kao, T.-Y. Wang, S. Kuo, L.-H. Chen and S.-D. Horng ... 3207

A learning-based methodology for dynamic scheduling in distributed manufacturing systems. C. Chiu and Y. Yih 3217

No. 12 December 1995

A case study on process optimization using the gradient loss function. J. L. Ribeiro and E. A. Elsayed 3233

Deadlock prediction and avoidance based on Petri nets for zone-control automated guided vehicle systems. C.-C. Lee and J. T. Lin 3249

A sequence-based materials flow procedure for designing manufacturing cells. P. Verma and F.-Y. Ding 3267

On-line scheduling in a multi-cell flexible manufacturing system. Y. Arzi 3283

System modelling for economic raw material selection. R. Chen, O. Hawaleshka and D. Strong 3301

ADVISOR: A computer-aided material handling equipment selection system. H.-K. Chu, P. J. Egbelu and Chung-Te Wu 3311

Scheduling of storage/retrieval orders under a just-in-time environment. M.-K. Lee and S.-Y. Kim 3331

Sequence for managing the situational factors to improve the performance of production and inventory control system. P. Yenradee, D. L. van Oudheusden and M. T. Tabucanon 3349

Features-based castability evaluation. B. Ravi and M. N. Srinivasan ... 3367

An introduction to the segmented flow approach for discrete material flow systems. D. Sinriech and J. M. A. Tanchoco 3381

A genetic algorithm for facility layout. G. Suresh, V. V. Vinod and S. Sahu 3411

Application of neural networks for surface roughness measurement in finish turning. D. Yan, M. Cheng, N. Popplewell and S. Balakrishnan ... 3425

Marginal analysis guided design justification: a material handling example. J. S. Noble and J. M. A. Tanchoco 3439

Parameter search as a simple computer vision methodology. D. Gibson and P. A. Gaydecki 3455

A knowledge-based approach to automated machining process selection and sequencing. T. N. Wong and S. L. Siu 3465

Discussion. A note on 'Effect of production cost on shelf life'.
S. VISWANATHAN 3485
Comment on Viswanathan's note. S. K. GOYAL 3487
